## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10, 15-17, 19, 20, 22, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Cartner (US Patent 3,949,539).

Cartner '539 shows a boom assembly including a boom support frame, a boom section pivotally connected to the boom support frame, a hydraulic breakaway cylinder 22 having a first condition for maintaining the boom section in the working position and a breakaway condition permitting movement of the boom section towards the breakaway position when the boom section encounters an obstacle, hydraulic valve structure 66 connected to the breakaway cylinder, an accumulator (reservoir) connected to the breakaway cylinder, wherein the hydraulic valve structure and the accumulator provide staged pressure control of breakaway cylinder operating pressure to absorb energy as the boom section moves from the working position, the staged pressure increasing as the boom section approaches the breakaway position to limit momentum of the boom section.

### ***Allowable Subject Matter***

Art Unit: 3752

3. Claims 11-14, 18, 21, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Cartner, Quick, and James are pertinent to Applicant's invention.
